

## Hosting

Mobile Vision also operates and manages a Java download System, named MOBIVO, which enables network operators, Service Providers, Media and Entertainment portals to rapidly launch a Java download service without costly infrastructure investment. All the games and other contents are hosted on Mobivo.

## Distribution

The distribution of these games is possible in 4 ways :

- Mobile Vision distributes the games (the Jad and Jar files)
- Mobile Vision distributes the games with the download services.
- Mobile Vision distributes the games with the download and the billing.
- Mobile Vision distributes the games with the download, billing and white labelled website or wapsite.

## References

Mobile Vision customers are mobile operators, wasps, mobile entertainment companies, media companies,...
